

Cento

façade access technology

3 and 4 Hardman Square Manchester

Project brief:

Provide access to two buildings requiring centre roof parking. BMUs to traverse around the full perimeter and pass beneath parapet support ties located on structural grid.

Solution:

1 x 3m reach slewing compact twin jib BMU on a freely laid non-roof penetrating track system incorporating points to parking spur.

1 x 2.5m reach compact twin jib BMU on a freely laid track with a sliding carriage unit for parking.
