

façade access technology

Civil Justice Centre Manchester

Project brief:

Provide access and maintenance to complex areas of façade including recesses up to 13 metres.

Solution:

1 x 9.5m reach luffing crane type BMU with adjustable jib head to accommodate interchangeable 15.5m and 2.5m operator cradles.

1 x 13.75m reach crane type BMU with luffing counterweight and jib to provide low profile parking of less than 2 metres above finished roof.

Both units include up to 700kg glass replacement facility.
