

façade access technology

Lewisham Hospital London

Project brief:

To provide façade access for a PFI building project requiring a 35 year operating life with comprehensive long term maintenance support.

Solution:

- 4 x compact twin jib BMUs on freely laid non roof penetrating track systems.
- 1 x aluminium enclosed monorail system supported by cantilevered brackets with a one-man powered hoisting cradle.
- 2 x Ariana fall restraint systems.
- 1 x aluminium enclosed monorail system on cantilevered roof mounted brackets with a bosun's chair.
