

Cento

façade access technology

University College Hospital London

Project brief:

To provide façade access and maintenance for a PFI building project requiring at least a 35 year operating life with comprehensive long term maintenance support.

Solution:

1 x 10.5m to 22.5m reach telescopic low profile Z-luffing crane type BMU.

1 x 7.2m reach crane type BMU with cantilevered cradle to provide access to recessed facades.

Both units with up to 300kg glass replacement facility.
